Profile Summary

- I am recently graduated with a degree in BCA, equipped with a solid understanding of HTML, CSS, and JavaScript, as well as exposure to modern frameworks like React.js, Node.js, and Express.js through coursework and projects.
- Demonstrated ability to learn quickly and adapt to new technologies, ready to apply analytical and problem-solving skills to front-end development challenges with enthusiasm and dedication.
- Excited about translating user interface designs into responsive and visually appealing web experiences, utilizing creativity and attention to detail to deliver intuitive interfaces that enhance user engagement.
- Committed to continuous learning and professional development, eager to stay updated on industry trends and best practices to continually improve as a front-end web developer and contribute positively to the team's success.

Training

Web Development, Infolabz, Gujarat, Ahmedabad

July 2023 -- May 2024

- Developed full-stack web applications utilizing MongoDB, Express.js, React.js, and Node.js (MERN stack).
- Built and deployed dynamic, responsive UIs with React.js and managed state using hooks.
- Implemented component-based architecture in React.js, promoting reusability and maintainability.
- Utilized React Router for seamless navigation and enhanced user experience in single-page applications.
- Gained proficiency in MongoDB, including CRUD operations, indexing, and schema design.

Projects

[Api Based News Website](#) | React.js, Rest API

- Developed a dynamic news website leveraging external news APIs.
- Designed and implemented a responsive frontend using React.js.
- Implemented caching mechanisms to improve loading times and reduce API call overhead.
- Implemented search functionality for users to find news articles by keywords.

[Crud Website](#) | React.js, Node.js, Express.js, MongoDB

- Developed a full-stack CRUD application using the MERN (MongoDB, Express.js, React.js, Node.js) stack, demonstrating proficiency in both frontend and backend development.
- Designed and implemented RESTful API endpoints for Create, Read, Update, and Delete operations, ensuring efficient communication between the frontend and backend.
- Created a user-friendly interface with React.js.

[Salon Appointment System](#) | React.js, Node.js, Express.js, MongoDB

- Developed salon appointment application with three modules: Admin, User, Barber.

- Developed a full-stack Salon Appointment application using the MERN (MongoDB, Express.js, React.js, Node.js) stack, demonstrating proficiency in both frontend and backend development.
- User can easily book appointment and can also make online payment.
- Created a user-friendly interface with React.js.

Technical Skills

- **Languages:** Javascript, Python, Java, SQL
- **Frameworks and Libraries:** React.js, Node.js, Express.js
- **Developer Tools:** Git, VS Code, Android Studio, Postman
